Commissioner for Patents
ATTN: Examiner M. Lee, Art Unit 2622
P.O. Box 1450
Alexandria, Virginia 22313-1450

Dear Commissioner or Examiner Lee:

In response to your office communication dated/mail date 05/14/2007 and in reference to Application number 10/820,268, I am providing the following information.

Regarding your statement "Applicant fails to provide a copy of the references discussed in the argument", I am providing copies of 3 of the references cited in my argument. The other references were references to patents (DeJesus-No. 5,061,052; Stevens-No. 6,018,339; Blum-No. 4,929,865) for which are available to the examiner.

Enclosed are copies of the book cover and introductory pages including the table of contents for the three books referenced in my referenced argument. Also included for each book are the pages in each chapter showing/discussing the information referenced in my argument. Copies of the information referenced from the Webster's dictionary are included. Copies of the patents referenced in my argument are also included for your convenience.

Note and Concern: I ordered all three of the referenced books from Amazon.com. When I received the third referenced book (Cutnell, John D. and Johnson, Kenneth W., Physics: Fourth Edition, Willey, 2998: 811), I found that the book only went up to 520 pages and page 811 (which) I referenced, was not included. This book has two volumes and I did not know this information. I have therefore included basic information from this book to show that I did acquire it for an appropriate response to you office communication. I am ordering the third book/volume II and I will also provide you with this information. If the other information provided is sufficient, please let me know. I am therefore providing you with a copy of the web site information ("Focal Length of Eyeglasses" found at <http://www.hypertextbook.com/facts/2002/RomaKaur.shtml>) used to prepare my argument. All three books used are referenced in this document.

Thank you.

William Redvers Belisle
